Part 1 - September 26, 2011 Part 2 – October 10, 2011

Introduction

- Presenters (Alex Bowie & Andrea Roess)
- Purpose
 - Provide background on CUSD facility funding
 - Provide clarity on CUSD CFD policy/procedures
 - Set foundation for future mitigation agreements
 - Provide direction to staff & answer questions
- Two-part presentation
 - 1. CFD background and mechanics
 - 2. Existing CFDs and prospective CFD policies

Part One - Background & Mechanics

- 1. Facility Needs for New Development
- 2. Funding Sources
- 3. Funding Source Issues
- 4. Mitigation Agreements
- 5. Community Facilities Districts
- 6. Future School Facilities Funding Options
- 7. CFD Policy Questions

1. Facility Needs for New Development

- Development project mix (housing type)
 - Single-family dwellings
 - Multi-family dwellings
 - Age-qualified housing
 - Commercial property
- Student Generation Rates (SGR)
- Resulting Project Students

1(a). Facility Needs Cont.

- Facility needs
 - Site acquisition
 - Schools
 - Classrooms
 - Site administration and support
 - Common spaces (MPR, fields, playgrounds, gyms, etc.)
 - Interim housing
 - Central administration
 - Ancillary support facilities

1(b). Facility Needs Cont.

- CUSD Policy What comprises a school?
 - Enrollment configuration and school size
 - K-5 + middle school vs. K-8
 - Technology components
 - Facility components by grade configuration
 - MPR, stadium, aquatic center, performing arts
- Determination of true school facility costs
- Determination of mitigation costs per dwelling unit

2. Funding Sources

- State School Facility Program
 - Grant program based on projected students
 - 50% State
 - 50% Local match
 - Reality = 35% state, 65% district
 - Legislation + bond election = funding uncertainties
- Local revenue sources
 - Developer fees
 - GO bonds
 - Mello Roos Community Facilities Districts
 - Developer mitigation agreements

3. Funding Source Issues

- Facilities needed concurrent with students
- Fees trickle in over time and lag students
- Need \$\$ to acquire sites and build schools now
- Challenges
 - GO bonds may not be approved by voters
 - State may not have \$\$ when it's needed
- Who bears risk of uncertain funding?

4. Mitigation Agreements

- CUSD school facility cost components
 - Land acquisition
 - Interim housing
 - Defined school facilities (complete school)
 - Central admin and support
- Funding
 - Timing of receipt of funds
 - Identify who bears funding risk?
 - Mitigation payments deposited as development occurs, subject to refund from bond proceeds

5. Community Facilities Districts

- CFD Mechanics
 - Mello Roos Act
 - Land owner self encumbers property to taxes
 - CFD generates revenue for capital improvements
 - Tax revenue stream pays bond debt service
- CFDs can provide funding for:
 - Capital facilities, maintenance, repairs, etc.
 - Allowable uses depends on authorization
- CUSD's primary facility funding mechanism

6. Future School Facilities Funding Options

Assume state funding combined with:

- Developer Fees
 - Level I
 - Level II (district must qualify to levy)
 - Not typically sufficient to cover costs
- GO Bond
 - Requires voter approval
- Negotiated agreements
- Mello Roos CFDs

7. CFD Policy Questions

- Formation of new CFDs
 - Specifically defined facilities or broadly described?
- State Funding Treatment?
- Pay-as-you-go proceeds use?
- Joint Community Facilities Agreement (JCFA)
- Maximum special tax (total effective tax rate)

7. CFD Policy Questions Cont.

- Annual special tax levy amount
 - Maximum levy vs. only what's needed to pay debt service and administration expenses
- Term of levy (number of years)
- Escalation
- Bond sale timing

End of Part 1

- Questions
- Comments

Part Two – Existing CFDs & Prospective CFD Policies

- 8. Existing CUSD CFDs
- 9. Post Initial Facilities Policies
- 10. Development Projects on the Horizon
- 11. Policy Questions/Direction
- 12. Conclusion Questions/Direction

8. Existing CUSD CFDs

- Review of Existing CUSD CFDs
 - 10 CFDs
 - Financial Information
- Authorized expenditures
 - Expenditure of Special Taxes (attachment)
- Permissible uses of CFD funds
 - Facilities that support the students residing in the areas from where the special taxes are collected.
 - Projects as defined in CFD formation documents

9. Post Initial Facilities Policies

- What to do with excess special taxes when initially anticipated projects are completed?
 - Retire outstanding bonds
 - Construct additional allowable projects
 - Additional capital projects
 - Facility Master Plan needs
 - Rehabilitation of existing facilities
 - Reduce annual tax levy
- Refunding Bonds
 - Refinancing the debt

10. Projects on the Horizon

- Rancho Mission Viejo Company
 - 14,000 units total (9 planning areas)
 - 8,000 units market rate
 - 6,000 units age qualified
 - Planning area #1 (Antonio Pkwy & Ortega Hwy)
 - 1,000 units (50/50 age qualified/market rate)
 - Planning area #2
 - 2,700 units (market rate)
- San Juan Hills Pacific Communities
 - 136 units

11(a). Policy Questions/Direction

- 1. What comprises a school?
- 2. Who bears risk of uncertain state funding?
- 3. How will future projects be funded?
- 4. If through CFDs, will agreements:
 - 1. Specifically or generally define facilities
 - 2. Have facility matched tax rates or defined rates
- 5. What will be the term of the levy?

11(b). Policy Questions/ Direction Cont.

- 6. What to do with excess special taxes when initially anticipated projects are completed?
- 7. Treatment of pay-as-you-go proceeds?
- 8. Should projects include JCFAs?
- 9. Refunding considerations?

12. Conclusion

- Questions
- Comments
- Direction

The End

Thank you!
