

STUDENT TEACHERS

The Governing Board may enter into contracts with teacher-training institutions for the training of qualified student teachers under the supervision of certificated personnel in the District.

The personnel office will be responsible for conducting negotiations with each institution and verifying credentialing requirements. Each building principal and supervising teacher will conduct the training program and forward a copy of the institution's mid-term and final evaluations to the department chairman.

Recognizing the importance of the teacher-training, the District shall provide for regular conferences including college personnel, student teacher and building principals, at least one of which will be held before the classroom assignment begins.

Additional compensation, by the contracting institution, shall be granted the supervising teacher in recognition of the extra time necessary in helping train the student teacher.
