Structured Teaching Educating
Prepared Students
(STEPS)

Preschool Program

Developing skills and opportunities of
learning through positive, high quality,
intensive instruction within a nurturing
environment

Early Intervention designed for
children with moderate to severe
developmental delays

The STEPS program is a developmental and language based preschool with an emphasis on:

- Communication
- Fine and Gross Motor Development
- Self-Help Skills
- Self-Regulatory and Sensory Motor Skills
- Attending Skills
- Social Emotional Skills

The Staff

Classes are taught by a certificated teacher with an Early Childhood Special Education credential. Classroom support personnel and related service providers work with the teacher to support individual student needs.

All of the staff members working with a child shares techniques to address individual goals and objectives. These are integrated into the learning environment.

Curriculum used in the Program

- California Department of Education Desired Results for Children and Families
- California Department of Education Preschool Learning Foundations
- California Preschool Curriculum Framework
- Thematic Based Curriculum

Developmental Profile (DRDP)

The DRDP is a statewide accountability and progress assessment system that measures the progress of California's preschool-age children with Individualized Education Programs (IEPs)

A combination of the curricular approaches incorporates the following:

- Learning areas or centers for small groups
- A balance between child-directed play and exploration and teacher-led small groups and large groups
- Content that is determined by individual student needs
- Recognition that learning occurs even in daily routines such as arrival and departure, snacks and meals, hand washing, toileting, cleanup, and transitions from activity to activity

Activities are presented through rich play based practices guided by the California Learning Foundations, California Preschool Curriculum Framework, Thematic Based Curriculum, and the DRDP.

Our Goal is to build a positive and collaborative partnership with each family which can help promote greater gains in each child's education.
