

The Preschool Structured Autism Class (SAC) is an intensive, highly structured, language-based Preschool classroom model offering intensity through the concentrated number of quality opportunities for learning engagement, in addition to the comprehensive number of program hours.

Capistrano Unified School District offers a comprehensive program utilizing Applied Behavioral Analysis in a developmental approach to address each child as a unique individual.

Activities are presented through developmentally appropriate research based practices guided by the California Preschool Learning Foundations, California Preschool Curriculum Framework, Unique Learning Systems Curriculum and the Desired Results Developmental Profile- Access (DRDP-A). The DRDP-A is a statewide accountability and progress assessment system that measures the progress of California's preschool-age children with Individualized Education Programs.

Each preschool child is provided a highly individualized and flexible program.

The Preschool SAC program is five days per week, five hours a day per school calendar.
